DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-29, 31-33, drawn to a magnetic nanoparticle comprising of a metal core and has a diameter of less than 2.5 nm.

Group II, claim(s) 52-58, drawn to a method of preparing the magnetic nanoparticle.

Group III, claim(s) 59-65, drawn to a method of detection an analyte using the nanoparticle.

Group IV, claim(s) 66-69, drawn to a method for vaccination using such nanoparticle.

Group V, claim(s) 70-72, drawn to a method for performing MRI using such nanoparticle.

Group VI, claim(s) 73-77, drawn to a method of treating cancer using the nanoparticle.

Group VII, claim(s) 78-79, drawn to a method for inhibiting tumor metastasis using the particle.

Group VIII, claim(s) 80, drawn to a method of performing myocardial salvage using the particle.

The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the same or corresponding special technical features are the magnetic nanoparticle.

However, such nanoparticle is taught by Murray et al. (WO99/61911).

Art Unit: 1641

Murray teaches a nanosized-particle having a core comprising of metal or metal alloys. Such metal or metal alloys include iron oxide (magnetic) or gold. (see pg. 6, line 175-185). The diameter of the nanoparticle ranges from 1 nm to about 100 nm. (see pg. 6, line 167).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
